CV

EDUCATION & EXPERIENCE

July 2019 – September 2019

Completed the JS-course at [Binary Studio Academy](#)

- [the course covered](#) JS, Node.js, Express.js, Passport.js, JWT, Socket.io, PostgreSQL, TypeORM/Sequelize, TypeScript, React, Redux, HTML5, SASS, Webpack, React Native, Git, Agile/Scrum
- worked in a team of 9 developers, 2 QAs and 2 mentors on the [Fantasy Premier League](#) project. This project was inspired by the [English Premier League Fantasy Football application](#). Fantasy football is an online game where participants select a team of real players and all the results of the players totally depend on the statistics of those players in real games.
- During project development, I:
 - implemented authentication using [Passport.js](#)
 - worked with [Express.js](#) on the backend, implemented routes and some business-logic
 - created components with [React](#) and [Redux](#) (Auth, Notification Centre, Team Selection)
 - worked with [Chart.js](#) for displaying statistic info
 - implemented drag&drop for team selection using [ReactDND](#) library
 - implemented app and email notifications using [Socket.io](#), [nodemailer](#), [node-scheduler](#)
 - presented implemented features during demo to Product Owner

26th June 2019

[Took part in IT Conference](#) at University of Applied Science (Augsburg, Germany)

June 2018 – present

Translator at [Codeguida](#)

- [translating articles about frontend development from English to Ukrainian](#)
- [creating frontend-digests](#)

September 2017 – present

Student at the Odessa National Polytechnic University

- [took active part in technical conferences](#)
- [was engaged in team projects](#)
