EDUCATION & EXPERIENCE

July 2019 – September 2019
Completed the JS-course at **Binary Studio Academy**

- **the course covered** JS, Node.js, Express.js, Passport.js, JWT, Socket.io, PostgreSQL TypeORM/Sequelize, TypeScript, React, Redux, HTML5, SASS, Webpack, React Native, Git, Agile/Scrum
- worked in a team on the **Fantasy Premier League** project. This project was inspired by the **English Premier League Fantasy Football application**. Fantasy football is an online game where participants select a team of real players and all the results of the players totally depend on the statistics of those players in real games.
- During project development, I:
  - implemented authentication on the frontend using **Passport.js**
  - worked with **Express.js** on the backend, implemented routes and some business-logic
  - created components with **React** and **Redux** (Auth, Notification Centre, Team Selection)
  - worked with **Chart.js** for displaying statistic info
  - implemented drag&drop for team selection using **ReactDND** library
  - implemented app and email notifications using **Socket.io**, **nodemailer**, **node-scheduler**

26 th June 2019
Took part in IT Conference at University of Applied Science (Augsbur, Germany)

June 2018 – present
Translator at **Codeguida**

- **translating articles about frontend development from English to Ukranian**
- **creating frontend-digests**

September 2017 – present
Student at **Odessa National Polytechnic University**

- **took active part in technical conferences**
- **was engaged in team projects**
